

## Sheet metal folder RED-2200/1.5/160\*

We are constantly expanding our offer to meet market requirements.

Thanks to many years of experience, highly qualified staff, high quality, aesthetics and reasonable prices, we have gained a stable position on the market and trust of customers.

Advantages of the machine: bending on 3 sides, space for processing inside the machine - 6 cm up and down

An absolute novelty from Prod-Masz! Bending beam only 15mm, for 1.5mm steel plate in 2m working length.

### **Description**

maximum working length: 2080 mm + 6 cm cut-outs in the beams on both sides of the machine

Bending capacity: up to 1.5 mm (steel sheet)

All non-ferrous metals 30% more bending capacity

Bending angle: max. 160 degrees

Cutting with roller shears over the entire working width

Thickness of the bending beam: 15 mm

Lifting the upper beam in three positions

max. opening: 80mm

Weight: approx. 540 kg

**Equipment:**

Protractor

Angle stop: up to 90 degrees

Rear stand for holding sheet metal

Front depth gauges
