

Sheet metal folder RED-4200/0.8/160*

Precise 4m bending machine for steel, copper, zinc and aluminum sheets.
Bending machine with side cut-outs in the beams.

Description

maximum working length: 4200 mm including cutouts (6 cm on each side)

Bending capacity: up to 0.8 mm (steel sheet)

Titanium-zinc sheet: 0.8mm, aluminum sheet: 1.0mm, copper sheet: 1.0mm

Bending angle of the bending machine: max. 160 degrees

Cutting with roller shears over the entire working width

Thickness of the bending beam: 20 mm

Lifting the upper beam in three positions

max. opening: 80mm

Protractor

weight: approx. 810 kg

Cutouts 60mm/45°
