

## Semi-Automatic Sheet metal folder ZGH-3140/1.2mm

- > Semi-automatic bending angle, set on encoder and potentiometer
- > The bending machine works as a semi-automatic. After bending, the beam returns to its original position and the pressure beam returns to the set height.
- > This press brake is suitable for series production.

### Description

maximum working length: 3140 mm  
max sheet thickness: for 1.2 mm (steel)  
Weight: about 1400 kg manual machine  
Lifting the upper beam in three positions  
Bending beam: 30 mm  
max. opening: 100 mm  
Bending angle: 155 degrees
